PREFACE.

The present General Subject-Index to 'The Ibis' embraces the period from the commencement of the Journal in 1859 up to the end of the Sixth Series in 1894, a term of thirty-six years.

The labour of compiling this Index has devolved on Mr. G. A. Doubleday, formerly Assistant Librarian, now Publication Clerk, to the Zoological Society of London, who has performed his task with great care and skill.

My own share in the work has been to check the accuracy of the references and to supervise the passage of the Index through the press. I trust that I have allowed no error to pass undetected.

EUGENE W. OATES.
